Fair Launch | No Pre-Allocation | No Presale | No Taxes | Community Funded

TOP KRC20 TOKEN ON KASPA

Nacho the Kat is making waves as the leading token on the Kaspa Network. Launched on June 30, 2024, Nacho achieved a \$60M+ market cap and boasts a thriving community of over 30,000 members. In just 24 hours, it achieved a complete supply mint, underscoring the demand and trust within the community, and driving over 10M KAS in added revenue for miners.

GLOBAL EXCHANGE ACCESS

Exciting news for the Nacho Nation! Nacho the Kat has partnered with Pionex Exchange, becoming the flagship KRC20 token for listing on both Pionex US-regulated and Pionex Global platforms. This partnership offers day-one access to NACHO for a global audience, unlocking substantial trading opportunities worldwide. With added CEX & DEX listings on the horizon, the future is bright.

GETTING TO KNOW NACHO

- First Fair-Launch KRC20 Token: No pre-mine, no team preallocations—100% community-driven & funded from day one.
- **Built on Kaspa:** Kaspa is the world's first blockDAG, a highefficiency proof-of-work network that is decentralized, scalable, and secure. Kaspa is being adopted across enterprise, industrial, commercial, and retail use cases across the globe.
- Fully Minted Supply (10M Mints): Minting NACHO required 10 million mints and was fully minted in less than 24 hours, proving demand and stability, with no further minting possible.
- Active, Engaged Community: Nearly 17,000 holders and a vibrant, growing community passionate about decentralization and transparency, aligning with the core ethos of crypto.
- Innovative Tools and Features: KatScan, the first KRC20 Explorer, and Kat Bot, a powerful Discord bot for seamless token interactions, and Kat Pool an open-source mining pool.
- Open-Source and Transparent: Nacho development and future initiatives are committed to open-source principles, transparent actions, and decentralized community governance.
- Strategic Growth Plans: Upcoming governance framework, NFT collection, Kat Pool mining pool, and the creation of the Kaspa Alliance for Transparency, adding utility and value to the token.
